Questions 36 - 40

Complete the summary below

Write NO MORE THAN ONE WORD AND/OR A NUMBER for each answer.

The Antarctic Toothfish

These are big fish, which live in freezing Antarctic waters at depths of 200 to 2,000 metres. They have a life span of roughly **36**years, and develop only slowly. Little is known about the early stages of life for this fish including the kinds of **37**that feed on the young. Since 1996, the December-February fishing season has resulted in catches of about 100,000 fish per year - although recent catches have declined because of **38**.....Industry spokesmen claim that the Antarctic toothfish industry is **39**but it has been estimated that fish numbers in the Ross Sea have already been reduced by at least a fifth, if not more. A plea has been made by several well-known marine scientists for a **40**.....on catching fish in the Ross Sea.
